Deloitte.

POLARIS Application Security Scan
version 1.0
*8/12/19, 12:43 PM*

sonarqube

1. POLARIS Application Security Scan

This chapter presents an overview of the project mesaures. This dashboard shows the most important measures related to project quality, and it provides a good starting point for identifying problems in source code.

1.1. Report Overview

Project Code Review Status

Code Compliance Percentage **80%**	**Rules Compliance** **GREEN - Above 90%** **ORANGE - 70% to 90%** **RED - Less Than 70%** Code Compliance Formula

Coding Rules Violations

Violations **22963**	Blocker	3
	Critical	48
	Major	4615
	Minor	7648
	Info	10649

Note: **PDF Report supports a maximum count of 10,000 violations per project. To view all violations associated to your project, please Login into SonarQube to view the complete report.**

Defect Analysis

Blocker =3 ● Critical =48 ● Major =4615 ● Minor =7648 ● Info =10649

sonarqube
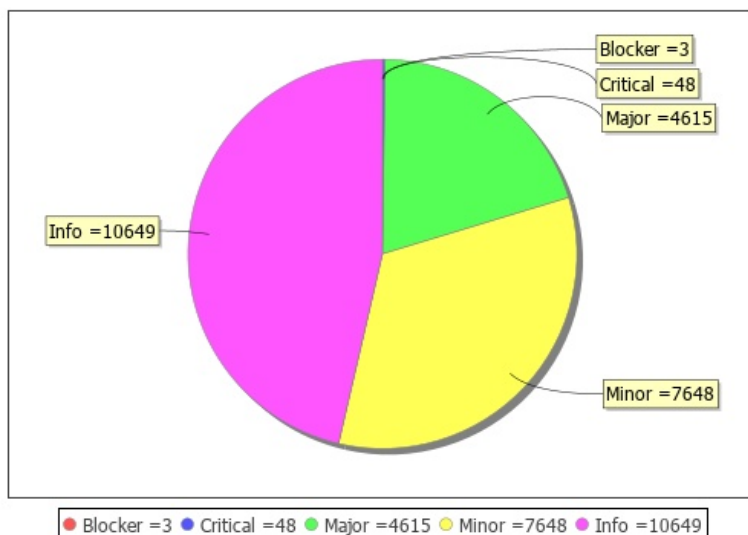

Static Analysis

Lines of code	**Classes**
108682	**1564**
174278 lines	149 directories
40114 statements	3654 methods
2111 files	

Comments(%)	**Duplications(%)**	**Technical Debt**
9.3	**13.2**	**521 hour 0**
11171 lines	22991 lines	**Minutes**
	863 blocks	Time required to fix
	210 files	the issues

Code Compliance Formula

%Compliance = 100 - (weighted_violations / Lines of code * 100)
weighted_violations is the sum of the violations weighted (whereas the
default values for blocker - 10, critical - 5, Major - 3, minor - 1, info - 0) by
the coefficient associated to each priority.

Take the example of any project.

Blocker   8
Critical   28
Major   361
Minor   1,012
Info   2,761

weighted_violations = (8*10+28*5+361*3+1012*1+2761*0) = 2315
LOC= 15879
%Compliance = 100 - (2315/15879 * 100) = 85.4

1.2. Violations Analysis

Most violated files	
classes/MetadataService.cls	9614
classes/ApplyForSobjectCtlr.cls	462
classes/CreateTestDataUtility.cls	320
classes/AddressJSUtility_CC.cls	216
classes/BackendQuestionAnswer_CC_Test.cls	212
classes/Polaris_ApplyForLicenseController.cls	173
classes/mdwebserviceaddress.cls	165
classes/Dol_WebServiceAddress.cls	161
classes/Polaris_RenewLicenseController.cls	157
classes/SharingUtilityController.cls	154

Most complex files

classes/MetadataService.cls	660
aura/LnP_ApplyForLicense/LnP_ApplyForLicenseHelper.js	437
aura/Polaris_RenewLicenseController/Polaris_RenewLicenseControllerHelper.js	429
classes/CartController.cls	339
classes/Polaris_ApplyForLicenseController.cls	274
classes/Polaris_RenewLicenseController.cls	223
classes/ApplyForSobjectCtlr.cls	207
classes/BackendQuestionAnswer_CC.cls	182
aura/LnP_LicenseAddress/LnP_LicenseAddressHelper.js	182
aura/License_Lookup/License_LookupHelper.js	172

Most duplicate files	
aura/LnP_ApplyForLicense/LnP_ApplyForLicenseHelper.js	972
aura/Polaris_RenewLicenseController/Polaris_RenewLicenseControllerHelper.js	947
classes/Polaris_RenewLicenseController.cls	818
classes/Polaris_ApplyForLicenseController.cls	761
aura/LnP_LicenseAddress/LnP_LicenseAddressHelper.js	756
classes/MetadataService.cls	681
components/Resources.component	520
components/ResourcesComp.component	520
pages/PlanReviewScheduler.page	505
pages/ScheduleReviewBackend.page	504

Most violated rules		
Variables should be declared explicitly	1	BLOCKER
Conditionals should start on new lines	4	CRITICAL
A conditionally executed single line should be denoted by indentation	3	CRITICAL
Use String.escapeSingleQuotes method to avoid SOQL injection.	41	CRITICAL
"for" loop should not have DML statements.	2	CRITICAL
Collection sizes and array length comparisons should make sense	1	MAJOR
Variables and functions should not be redeclared	252	MAJOR
Properties of variables with "null" or "undefined" values should not be accessed	3	MAJOR

Images tags should have an "alt" attribute	7	MAJOR	
Property names should not be duplicated within a class or object literal	1	MAJOR	
Images tags should always have a "width" and a "height" attribute	1	MAJOR	
Nested blocks of code should not be left empty	6	MAJOR	
Two branches in a conditional structure should not have exactly the same implementation	20	MAJOR	
Collection elements should not be replaced unconditionally	1	MAJOR	
Avoid non consecutive heading tags	39	MAJOR	
@AuraEnabled does not have proper error handling	247	MAJOR	
Non-empty statements should change control flow or have at least one side-effect	211	MAJOR	
Avoid hardcoding of string variable.	500	MAJOR	
Collection and array contents should be used	10	MAJOR	
All branches in a conditional structure should not have exactly the same implementation	2	MAJOR	
Related "if/else if" statements and "cases" in a "switch" should not have the same condition	3	MAJOR	
Avoid fetching redirection url form returnUrl parameter in page Url.	205	MAJOR	
Tags no longer supported in HTML5 should not be used	12	MAJOR	
Conditionally executed blocks should be reachable	3	MAJOR	
Assignments should not be redundant	9	MAJOR	
Array-mutating methods should not be used misleadingly	1	MAJOR	

"strong" tags should be used instead of "b"	34	MAJOR
Dead stores should be removed	89	MAJOR
Variables should not be self-assigned	2	MAJOR
Boolean expressions should not be gratuitous	15	MAJOR
"em" tags should be used instead of "i"	1	MAJOR
Mouse events should have equivalent keyboard events	89	MAJOR
"alert(...)" should not be used	32	MINOR
Return of boolean expressions should not be wrapped into an "if-then-else" statement	2	MINOR
Null check in where clause	239	MINOR
Unused local variables and functions should be removed	93	MINOR
Debugger statements should not be used	43	MINOR
Catch blocks shouldn't have instance of'.	500	MINOR
Extra semicolons should be removed	5	MINOR
Equals Null.	2	MINOR
Avoid SOQL in controller getter methods	14	MINOR
Use SOQL as Conditional argument in for loop	109	MINOR
Empty Method In Abstract Class Should Be Abstract.	500	MINOR
Avoid bad Crypto Calls.	1	MINOR
ApexCRUDViolation	500	MINOR
Apex Sharing Violations	32	MINOR
"switch" statements should have at least 3 "case" clauses	10	MINOR
Apex XSS From URLParam	26	MINOR
Avoid same SOQL in same method	73	MINOR
System debug.	500	MINOR
Avoid Deeply Nested If Statements	125	MINOR

Abstract class without any methods.	500	MINOR
Avoid logic in trigger	45	MINOR
Do not use Global Modifier.	213	MINOR
Simplify Conditional Check	20	MINOR
Simplify boolean returns.	7	MINOR
Empty method should not remain uncommented.	157	INFO
Unused Formal Parameter	500	INFO
Avoid unnecessary comparisons in boolean expressions.	229	INFO
Uncommented Empty Constructor	32	INFO
Unused Private Field	500	INFO
Tests - Unnecessary boolean assertion	93	INFO
Public Static field should be final	30	INFO
Use Object for Clearer API	128	INFO
At Least One Constructor.	500	INFO
Excessive Method Length	2	INFO
Excessive Parameter List	6	INFO
Preserve Stack Trace.	2	INFO
